The Master Craftsman Program at Kennesaw State University, housed in the School of Art and Design, serves to bring students and the community together through public art. This student-driven program began in 2017 and works to strengthen community ties while enhancing the student experience and public awareness of art. Students partner with businesses and municipalities such as the City of Kennesaw, the City of Acworth Police Department, the William Root House Museum, the Southern Museum of Civil War and Locomotive History, and Smith-Gilbert Gardens to design, fabricate, and install artworks in a variety of materials and sizes.

Students in the Master Craftsman Program, many of whom are not sculpture majors, learn new skillsets that help prepare them for working as professional artists such as how to interact with clients, how to create project proposals and quotes, and how to effectively pitch their ideas to potential clients. Students also learn fabrication skills which include welding and metal casting. Projects have included sculptural benches, bike racks, signage, memorial sculptures, and even custom cast-iron manhole covers.

By participating in the Master Craftsman Program, students become active partners and stakeholders in the community. The creative placemaking undertaken through the community engagement and partnership also enhances the surrounding areas and stands as a point of pride for the Master
